I'll be attending the DoD sand fly meetings again at the end of February. I'd like to meet, if possible, on the afternoon of Monday, February 23, around 2 p.m. I would like to discuss the following topics:

- Addition of prairie dogs to 72500-17 Rodent Flea Bait- FWS contacted me again about adding it to the squirrel label

- Addition of prairie dogs to 72500-13, which currently has California ground squirrels only (efficacy on prairie dogs submitted last year along with blood titer lab study)
- RUP determination for diphacinone at 0.0025% where 0.005 and 0.01% are general use classifications
- Review status of SLN Pharmachem Warfarin, File Symbol 72500-RL
- Rodenticide risk mitigation-general discussion

I'm off to Israel chasing fat sand rats and dodging missiles next week.
